week-12-overview-3

Week 12 - Overview
Welcome to week 12

The week will review all topics learned in this course.

Learning Outcomes

CLO 1: model and implement efficient big data solutions for various application areas using appropriately selected algorithms and data structures.
CLO 2: analyse methods and algorithms, to compare and evaluate them with respect to time and space requirements and make appropriate design choices when solving real-world problems.
CLO 3: motivate and explain trade-offs in big data processing technique design and analysis in written and oral form.
CLO 4: explain the Big Data Fundamentals, including the evolution of Big Data, the characteristics of Big Data and the challenges introduced.
CLO 5: apply non-relational databases, the techniques for storing and processing large volumes of structured and unstructured data, as well as streaming data.
CLO 6: apply the novel architectures and platforms introduced for Big data, i.e., Hadoop, MapReduce, and Spark.
This Week's Learning Activities

Section Activity Duration

Before Class

Watch the video lectures and

Complete reading

2 hours

Lectorial & Lab

Join the timetabled interactive session

2 hours + 2 hours

Assessments

Working on Assessment

Revisit lectures

2 hours + 2 hours
